Serving Telluride for over 22 years. Please check out our website! When we do fire mitigation work, we selectively remove trees which are the biggest threat to the safety of your home. We do this with great care, keeping in mind your privacy screening, best views, health of the trees, and preserve your landscape. We utilize chips to create meandering pathways for your enjoyment. We have a commercial chipper to chip directly into our dump truck. This enables us to haul away debris free of mess and damages. We are fully licensed and insured. We are equipped with proper OSHA regulated equipment as well as the equipment to get the job done quickly. We utilize a crane to lift our chainsaw operators by basket to remove trees in sections, and lower these sections by rope. This is a much safer procedure, for our crews as well as the home and landscape. It is very fast, efficient, and minimally invasive. We work under Mountain Village and Forest Service regulations. We also realize the visions that the homeowner has for their mountain home landscape. We offer different options to make it more affordable as well. Lance can be reached directly on his cell phone at (970) 729-0411. Lance is on every tree removal job, ensuring the highest quality work and safety.

Thank you for the opportunity, we appreciate it very much!

Sincerely,
