Fax: (970) 728-0117  
Email: [lancescapes@telluridecolorado.net](mailto:lancescapes@telluridecolorado.net)  
[www.lancescapes.net](http://www.lancescapes.net)

Serving Telluride for over 22 years. Please check out our website! When we do fire mitigation work, we selectively remove trees which are the biggest threat to the safety of your home. We do this with great care, keeping in mind your privacy screening, best views, health of the trees, and preserve your landscape. We utilize chips to create meandering pathways for your enjoyment. We have a commercial chipper to chip directly into our dump truck. This enables us to haul away debris free of mess and damages. We are fully licensed and insured. We are equipped with proper OSHA regulated equipment as well as the equipment to get the job done quickly. We utilize a crane to lift our chainsaw operators by basket to remove trees in sections and lower these sections by rope. This is a much safer procedure, for our crews as well as the home and landscape. It is very fast, efficient, and minimally invasive. We work under Mountain Village and Forest Service regulations. We also realize the visions that the homeowner has for their mountain home landscape. We offer different options to make it more affordable as well. Lance can be reached directly on his cell phone at (970) 729-0411. Lance is on every tree removal job, ensuring the highest quality work and safety.

### **Telluride Forestry Solutions**

Contact: Roby Peabody  
Office: 970-708-0660

### **Telluride Land Works**

Contact: Paul Sherry  
Office: 970-728-5555  
Email: [psherry@sherrygroup.net](mailto:psherry@sherrygroup.net)

For 26 years here in Telluride, Telluride Land Works has worked felling trees, removing fuel debris from the site, and processing woody material at my yard just pass Ophir turn off. Telluride Land Works has removed trees ranging from big to small projects in this area-from the clearing of the parking structure and Mountain Market in the Village, large acreage home sites, to a single tree request. We are fully equipped-dump truck, loaders, to excavators, large chippers and splitters-and manned, with experienced workers. All workers are on the books-we use the H2-B Visa program for labor (we **do not use** contract labor with the 1099's). I have 2 full time office workers and all crews have Motorola Radios and GPS-communication is conducted with in minutes. All TLW's employees are covered fully by TLW's Insurance and Workers Compensation. TLW's has large liability Business insurance. I am relieved to say we have operated without incidents. We recycle garden & woody waste by composting it in my Ophir site, also our removed trees are recycled there by mulching and producing rounds, split wood and chipped mulch. The travel distance is short for this region-a low carbon foot print, and it keeps this wood product out of the landfills. TLW is also a full range landscape and design build company; I have worked with my wife, Michelle who is a certified master garden and very adept with tree care.
