

TOWN OF MOUNTAIN VILLAGE

455 Mountain Village Blvd. Mountain Village, CO 81435 (970) 369-8236

IRRIGATION ASSESSMENT

Irrigation Mainline and Supply from the Home

1.	Does the irrigation have a water meter separate from the house meter?	
	Yes	No
2.	Is there a certified and	d code backflow preventer? (Tested annually)
	Yes	No
3.	Is there a master valve?	
	Yes	No
4. Does the mainline pressurize and 'check' (Water stops indicating no leaks)		essurize and 'check' (Water stops indicating no leaks)
	Yes	No
Notes:		
rvoics.		
Techno	ologies	
Techno	_	erSense 'smart' controller? (Meaning can it connect to the internet with weather-
	Is there an EPA Wate	erSense 'smart' controller? (Meaning can it connect to the internet with weather-
	Is there an EPA Wate based information) Yes	
1.	Is there an EPA Water based information) Yes Is there a weather sen	No
1.	Is there an EPA Water based information) Yes Is there a weather sensensor) Yes	No sor onsite? What kind? (e.g., Rain, temperature, soil moisture, ET enabled
2.	Is there an EPA Water based information) Yes Is there a weather sensensor) Yes	No sor onsite? What kind? (e.g., Rain, temperature, soil moisture, ET enabled
2.	Is there an EPA Water based information) Yes Is there a weather sensensor) Yes Do the sensors work? Yes	No sor onsite? What kind? (e.g., Rain, temperature, soil moisture, ET enabled No Is the Wi-Fi weather monitoring enabled and functioning correctly?
 2. 3. 	Is there an EPA Water based information) Yes Is there a weather sensensor) Yes Do the sensors work? Yes	No sor onsite? What kind? (e.g., Rain, temperature, soil moisture, ET enabled No Is the Wi-Fi weather monitoring enabled and functioning correctly?

IRRIGATION ASSESSMENT

Action: Test each zone coverage and uniformity

1.	Are the zones designed with head-to-head coverage?		
	Yes	No	
2.	Does each zone operate each zone)	with matched precipitation? (Meaning the nozzles/emitters are matched in	
	Yes	No	
3.	Are water saving heads	being utilized? Do heads contain check valves or pressure reducers?	
4.	Are low application rate nozzles being utilized?		
5.	Does the zone irrigate l	ike plant types? Like micro-climates? Like soil types and slope angles?	
6.	Is the system showing signs of high or low pressure?		
	High	Low	
7.	Are pressure reductions used at the valve? (Pressure can be reduced at the house supply, irrigat supply, irrigation valves or at the individual heads)		
	Yes	No	
Notes:			
Landsc	eape Plant Types		
1. Is there drip irrigation for perennial gardens		or perennial gardens, shrubs and trees?	
	Yes	No	
2.	Does an individual zone irrigate multiple plant types with different water requirements?		
	Yes	No	
3.	Do zones overlap irrigating an area 'twice'?		
	Yes	No	
Notes:
